Software Engineer (Backend) | Java 21, Spring Boot, microservices for telecom commerce

EXPERIENCE

Comviva — Bengaluru, India
Software Engineer (Backend) — Aug 2025 – Present

- Root-caused a Critical incident at an operator's iPhone 18 launch (180 s checkout timeouts, 2.5/3 CPU cores): thread/heap dumps showed 14 async calls queued on Java's commonPool plus an O(n^2) mapper.
- Fixed it with a bounded executor (8–16 threads, queue of 200, CallerRunsPolicy) and O(1) map lookups with identical output; added 8 JUnit/Mockito tests; the full suite gave the same results before and after.
- Shipped 258 commits on 78 Jira tickets in 12 months to 3 Java 21 / Spring Boot microservices that decide product, promotion and recommendation eligibility for telecom offers (gRPC, Kafka, MongoDB).
- Delivered multi-version product-offering support for promotion qualification: passed versions to the rule engine, defaulted missing ones, backfilled old data; one of 90+ tickets across both services.
- Fixed a 500 error with multiple catalogue versions and a Kubernetes rollout rejected over a 2-space Helm YAML dedent; added multi-IdP sign-in (Keycloak, JWT) and reworked shared Kafka auth.
- Built the dashboard and browsing panel of AI Assets, the company hub for ~316 shared AI assets (web and VS Code), and wrote agents, skills, tools and MCP servers for it; kept all 4,519 tests green.
- Built a human-approved AI bug-triage workflow that cut ~12 h of estimated manual investigation to 45.7 measured minutes.

Omvad (Ramai) — Gurugram, India
Software Developer Intern — Jun 2025 – Aug 2025

- Built the React Native (Expo) iOS/Android app and its FastAPI (Python) backend for users' health records.
- Synced Apple Health, Apple Watch, Google Fit and Fitbit data and built a real-time AI health assistant.

STEMMED Edvocations — Remote
Front-end Developer Intern — Feb 2025 – May 2025

- Built a React course store with an AWS-hosted database, a payment gateway and a product-finder chatbot.

Freelance — Remote
Freelance Web Developer — 2024 – Feb 2025

- Built websites and Shopify stores for small businesses, including bababhandar.in (live).

PROJECTS

Stock Trend Tracker — Code: github.com/meCeltic/stock-trend-tracker
Java, Spring Boot, Spring Data JPA, React, Vite

- Built a Spring Boot backend (scheduled jobs, JPA repositories, REST APIs) behind a React price chart.

VireoCast — Live: vireo-cast.vercel.app
Python, FastAPI, async SQLAlchemy, PostgreSQL (Neon), GitHub Actions

- Built a scheduled pipeline that pulls trends from 6 sources, scripts and voices Shorts with Gemini, renders them with FFmpeg and has published 25 Shorts on its own at $0/month infra cost.

SKILLS

Languages: Java 21, Python, SQL, TypeScript
Backend: Spring Boot 3.5, Spring Data JPA/Hibernate, REST, gRPC, Kafka, MongoDB, PostgreSQL, Keycloak/OAuth2/JWT, microservices
Concurrency & Performance: multithreading, performance tuning, ExecutorService tuning, thread/heap dump analysis, JMeter
Testing & Quality: JUnit, Mockito, JaCoCo, SonarQube, Trivy, Postman, Swagger/OpenAPI
Build & Infra: Gradle (multi-module), Docker, Kubernetes, Helm, Jenkins, GitHub Actions, CI/CD
Also: React, React Native, Next.js; Claude Code, MCP, Gemini API; Agile (Jira, Confluence)

EDUCATION

SRM Institute of Science and Technology, Chennai — Jul 2020 – Jun 2024
B.Tech, Computer Science | CGPA 9.00/10

Certifications: AWS Academy Cloud Operations; AWS Academy Cloud Security Foundations
