Backend Engineer | Production telecom microservices (Java 21, Spring Boot, gRPC, Kafka, K8s) | AI dev tools

EXPERIENCE

Comviva (telecom software; BlueMarble commerce platform)

Bengaluru, India

Software Engineer

Aug 2025 – Present

- Core contributor to the 3 eligibility microservices that decide which plans, promotions and offers a customer can buy, mapping carts into gRPC rules-engine calls and consuming Kafka catalogue events; delivered 90+ features and production fixes across 3 releases, from multi-version catalogue support to promotion-simulation mapping.
- Diagnosed a Critical incident at an operator's iPhone 18 launch (CPU at 2.5 of 3 cores, checkout timeouts at 180 s): thread and heap dumps showed unbounded async work on Java's shared thread pool plus an $O(n^2)$ catalogue mapping; fixed both via a bounded executor and indexed lookups, output unchanged (8 new tests).
- Root-caused other production defects, e.g. a 500 error when two catalogue versions were live and a Kubernetes rollout rejected by a 2-space Helm YAML indent that helm lint misses.
- Added sign-in through multiple identity providers (Keycloak, JWT), reworked Kafka authentication in the shared common library, and fixed container vulnerabilities flagged by Trivy and AWS Inspector.
- Co-built AI Assets, the company's web and VS Code app for ~316 shared AI assets (agents, skills, templates), building its dashboard and browsing panel; added one-click AI log analysis to its 39-tool extension.
- Built a bug-triage workflow (a lead AI agent, 14 specialised agents, human approval) used on 93 tasks; 4 measured cases took 45.7 min vs ~12 h estimated by hand, e.g. a missing catalogue record found in 12.8 min.

Omvad (Ramai)

Gurugram, India

Software Developer Intern

Jun 2025 – Aug 2025

- Built the entire frontend and backend of an iOS/Android health app (React Native, Node.js) unifying medical reports, body metrics and smartwatch data, with 3D body models and an AI chatbot; worked with designers.

STEMMED Edvocations

Remote

Software Developer Intern (Front-end)

Feb 2025 – May 2025

- Built product pages for an EdTech startup in React, connected to a cloud (AWS) database and online payments, plus a chatbot that helps customers find the right product.

Freelance Web Developer

Remote

Self-employed

2024 – Feb 2025

- Built websites and online stores for small businesses on Shopify and the web, including [bababhandar.in](#) (live).

PROJECTS

Stock Trend Tracker

[Code](#)

Java, Spring Boot 3, Spring Data JPA, React, Vite

- Built a Spring Boot backend with scheduled jobs, a database layer and documented REST APIs, plus a React front-end that charts stock prices.

Bookmark-AI

[Live](#) | [Code](#)

Next.js, TypeScript, Supabase, Jina AI

- Built and deployed a web app that saves links behind a sign-in and writes an AI summary of each page; tags, drag-and-drop ordering, offline use.

SKILLS

Languages: Java 21, Python, TypeScript, SQL (PostgreSQL); front-end/mobile: React, React Native, Next.js

Backend & Data: Spring Boot 3.5, REST APIs, gRPC, Kafka, microservices, Keycloak/JWT, MongoDB, JUnit

Infra & Tools: Docker, Kubernetes, Helm, Jenkins, GitHub Actions, Git, Postman, JMeter, Swagger/OpenAPI

AI & Agents: Claude Code, MCP, Gemini API, LLM integration, agentic workflows

EDUCATION

SRM Institute of Science and Technology, Chennai, India

2020 – 2024

B.Tech, Computer Science, CGPA 9.00/10

Certifications: AWS Academy Cloud Operations and Cloud Security Foundations; ML Specialization (Coursera)
